- Typing, Data Entry & Online/Product Research

About Me

Passionate about technology with hands-on experience in networking, CCTV installation, and troubleshooting tasks like termination and cable tracing. Contributed to a college team project by developing a dynamic school website using WordPress, customized with HTML and CSS for a clean, user-friendly design. Collaborative, adaptable, and skilled in time management and communication under pressure, making me a strong asset to any team.

Experience

On Job Training

Aug, 2024 -Nov, 2024

Wilmer Manimtim Mauricio | ITSolution-WMM 411 Sungay West, Sungay North Tagaytay City

During my OJT with ITSolution-WMM, I gained hands-on experience in the installation, maintenance, and troubleshooting of CCTV systems. I was responsible for installing and terminating CCTV cameras, managing wiring, and resolving network and connection issues to ensure system reliability. My key projects included installations at Char's Garden Cafe, Lake Hotel Tagaytay, and DIY Dad, where I contributed to improving security infrastructure. This experience sharpened my technical skills in networking and security systems, while also enhancing my ability to collaborate effectively with a team and communicate professionally with clients.

WordPress Web Development

Feb 2025 - Mar 2025

Kurios Christian Colleges Foundation | Magallanes, Cavite

During my college days, I gained hands-on experience through academic projects and practical work in my field. For my capstone project, I developed a fully responsive school website using WordPress, customized with HTML and CSS to improve navigation, usability, and overall design. This project strengthened my technical skills and provided real-world experience in web development, user-focused and user-friendly design, and project collaboration. It also enhanced my attention to detail, time management, and ability to work effectively in a team. I'm excited to carry this foundation forward as I continue to grow professionally.
